Summary

Junior Software Developer with 2+ years of professional experience building scalable web and mobile applications using React.js, Next.js, and React Native. Proficient in the full Software Development Life Cycle (SDLC), creating clean, maintainable code within Agile methodologies. Experienced in optimizing frontend performance and executing seamless API integrations in both large-scale corporate environments and startup teams. Passionate about applying user-centered design principles to deliver innovative solutions.

Education

Istanbul Technical University

2022 – Present

Electronics and Communication Engineering

- GPA: 3.10

Relevant Course Work

- Software Development: Mobile App Development, Frontend & Backend Development
- Algorithms & AI: Data Structures, Algorithm Analysis, Machine Learning

Experience

Tatilsepeti

Sep 2025 – Present

Jr. Software Developer

Istanbul, Turkey

- Collaborated with a team of developers to modernize a legacy internal workflow platform across the full **Software Development Life Cycle (SDLC)**, utilizing **Next.js** and **Material UI (MUI)** to enhance usability for 200+ employees.
- Developed dynamic dashboards for Sales, Marketing, and SEO teams to track operational metrics and manage **100,000+ data records**, ensuring high performance and data accuracy.
- Executed seamless **API integration** with backend services to replace outdated manual reporting workflows with real-time, automated data visualization tools.
- Authored technical documentation for the new component library, facilitating the transition from the legacy system and standardizing development practices.
- Participated in sprint planning and code reviews, improving code quality and aligning with agile development practices.

Tatilsepeti

Jul 2025 – Aug 2025

Software Development Intern

Istanbul, Turkey

- Contributed to **Agile methodologies** by actively participating in sprint planning and daily stand-ups, supporting the migration of legacy internal tools to a modern React architecture.
- Debugged and optimized **React.js** components for internal administrative interfaces, resolving UI/UX inconsistencies to improve staff productivity.
- Utilized GitLab for version control, managing **feature branches** and code reviews to ensure safe integration of new features into the production environment.

VISIGHT Technology

Dec 2024 – Apr 2025

Mobile App Development Intern

Istanbul, Turkey

- Led the end-to-end **mobile development** of a greenfield React Native app, taking full ownership of architecture and delivering the MVP within a strict 4-month timeline.
- Implemented Object-Oriented Programming principles and centralized state management (Redux Toolkit) to build modular, scalable UI components.
- Integrated **asynchronous programming** patterns with Firebase for robust authentication and real-time database interactions.

Projects

Pokerist – Texas Hold'em Analyzer iOS App

Oct 2025

- Engineered a native iOS hand analyzer using **SwiftUI** and **Combine** within a clean **MVVM** architecture, delivering a production-ready application in a 3-month timeline.
- Implemented an asynchronous Monte Carlo simulation processing 10,000 games per hand to calculate win probabilities without blocking the main UI thread.
- Authored detailed technical documentation for the simulation algorithms, facilitating future maintenance and explaining complex logic to non-technical stakeholders.
- Designed a "Liquid Glass" UI with adaptive dark/light modes, ensuring a seamless user experience across different iOS environments.

Sudoku Mobile App

Jun 2025

- Developed a high-performance, cross-platform game using **React Native**, **TypeScript**, and Expo, achieving consistent 60fps animations on both iOS and Android.
- Architected an **offline-first** data layer using local storage, ensuring full app functionality in low-connectivity environments.
- Refined the difficulty algorithm based on beta testing feedback from 20+ users, directly improving session retention metrics.
- Implemented a centralized theming system using React Context, allowing for scalable design updates and accessibility improvements.

Certificates

META

Create the User Interface with SwiftUI

- Successfully completed the course by META about learning the SwiftUI essentials.

Stanford University with Koc University and Czech Technical University

CS-Bridge, Introduction to Computer Science

- Successfully completed the summer program inspired by Stanford's CS160 - Programming Methodologies.

Skills

Programming Languages & Tools

- JavaScript, Python, C/C++, TypeScript, Swift, SQL, HTML, CSS, TensorFlow, PyTorch

Mobile & Web App Development

- React Native, Flutter, SwiftUI, React.js, Next.js, Firebase, Supabase, Django, Flask

Volunteering

ITU Alumni Association Club

Sep 2024 – Jun 2025

Board Member and Committee Coordinator

Istanbul, Turkey

- Organized and executed 10+ corporate visits per semester to large-scale companies like Turkish Technic and Is Bankasi, giving 250+ students access to firsthand career insights.
- Built long-term partnerships with company representatives and alumni to support recurring events and internship pipelines.
