### SUMMARY

---

Software Developer with 5+ years of experience with programming languages as Python, JavaScript, C/C++, and 2+ years of experience building scalable web and mobile applications using modern frameworks like React.js and React Native. Skilled in crafting clean, maintainable code, integrating AI tools, and optimizing performance across frontend and backend systems. Proven track record in both large-scale corporate environments and agile startup teams, also gained experience in the U.S. service industry during my long-term stay there. Strong background in algorithm design, cross-functional teamwork, and leadership through student organizations. Passionate about developing user-centered, innovative solutions that solve real-world problems.

### EDUCATION

---

**Istanbul Technical University**

**2022 – Present**

*Electronics and Communication Engineering*

- GPA: 3.51

*Relevant Course Work*

- Software Development: Mobile App Development, Frontend & Backend Development
- Algorithms & AI: Data Structures, Algorithm Analysis, Machine Learning

### EXPERIENCE

---

**Tatilsepeti**

**Sep 2025 – Present**

*Jr. Software Developer*

*Istanbul, Turkey*

- Independently developed frontend features for a new project, a Next.js and React.js control panel used by 500+ hotel owners to manage reservations, payments, and guest interactions.
- Built and optimized reusable components and hooks for a platform with 10,000+ monthly active users, to enhance performance and maintainability across the platform.
- Collaborated closely with backend teams to ensure API responses were correctly integrated into booking and payment modules
- Used GitLab for version control and collaborative workflows, regularly contributing features through merge requests.
- Implemented error handling and loading states to improve reliability and user experience across data-heavy pages.
- Participated in sprint planning and code reviews, improving code quality and aligning with agile development practices.

**Tatilsepeti**

**Jul 2025 – Aug 2025**

*Software Development Intern*

*Istanbul, Turkey*

- Assisted in building React.js components for their new project, supporting hotel owners with features to track reservations, payments, and guest comments.
- Learned professional collaboration practices using GitLab, contributing to feature branches under supervision.
- Shadowed senior developers and coordinated with backend teams to understand how APIs connect frontend and backend systems.
- Practiced debugging and troubleshooting React components under guidance, gaining hands-on experience with real-world issues.
- Documented component structures and project setup, helping future interns quickly onboard to the project.

**VISIGHT Technology**

**Dec 2024 – Apr 2025**

*Mobile App Development Intern*

*Istanbul, Turkey*

- Led the development of a greenfield React Native mobile app for a startup; taking full ownership of architecture, design, and implementation (similar to *the Student Clubs Communication App* project), under the guidance of the co-founder.

- Built modular, reusable UI components and managed app state using Redux Toolkit and Context API, ensuring scalability and maintainability across both Android and iOS.
- Integrated Firebase services for authentication and real-time database functionality.
- Designed and implemented navigation flows using React Navigation, creating a smooth user experience across screens.
- Conducted testing on both Android and iOS simulators, debugging platform-specific issues to ensure consistent performance.

## PROJECTS

---

### Pokerist – Texas Hold'em Analyzer iOS App

Oct 2025

- Developed a native iOS Texas Hold'em hand analyzer using SwiftUI, supporting real-time hand analysis, win probability calculations, and multi-player analysis for up to 6 opponents.
- Implemented an asynchronous Monte Carlo simulation (10,000 games) to deliver accurate probability calculations without blocking the UI, and designed a modern "Liquid Glass" UI with adaptive dark/light mode support.
- Architected the app using modern SwiftUI observable state management with a centralized GameState, and built intuitive UX features including smart card selection with duplicate prevention and swipe-to-delete gestures.

### Sudoku Mobile App

Jun 2025

- Developed a feature-rich Sudoku game using React Native, TypeScript, and Expo, supporting multiple difficulty levels, undo functionality, note-taking, and smart input validation for a better user experience.
- Implemented offline-first architecture using local storage, integrated animated UI with React Native Reanimated, and designed a centralized theming system for a sleek, accessible, and responsive interface.

### Student Clubs Announcement App

Feb 2024 – May 2024

- Built and deployed a cross-platform React Native app for student club event management and announcements via a clean, Instagram-style feed.
- Designed scalable frontend architecture using component-based principles, integrated Firebase for backend services including Firestore, authentication, and cloud messaging.

## CERTIFICATES

---

### META

Summer 2025

#### *Create the User Interface with SwiftUI*

- Successfully completed the course by META about learning the SwiftUI essentials.

### Stanford University with Koc University and Czech Technical University

Summer 2020

#### *CS-Bridge, Introduction to Computer Science*

- Successfully completed the summer program inspired by Stanford's CS160 - Programming Methodologies.

## SKILLS

---

### Programming Languages & Tools

- JavaScript, Python, C/C++, TypeScript, SQL, HTML, CSS, TensorFlow, PyTorch

### Mobile & Web App Development

- React Native, Flutter, Swift, SwiftUI, React.js, Next.js, Firebase, Supabase, Django, Flask

## VOLUNTEERING

---

### ITU Alumni Association Club

Sep 2024 – Jun 2025

#### *Board Member and Committee Coordinator*

*Istanbul, Turkey*

- Organized and executed 10+ corporate visits per semester to large-scale companies like Turkish Technic and Is Bankasi, giving 250+ students access to firsthand career insights.
- Built long-term partnerships with company representatives and alumni to support recurring events and internship pipelines.
