

Kerem Kirici

Junior Software Developer

kerem.kirici36@gmail.com | <https://www.linkedin.com/in/kerem-kirici>
<https://kerem-kirici.github.io> | <https://github.com/kerem-kirici>

Summary

Junior Software Developer with **2+ years of professional experience** building scalable **full-stack, web, and mobile applications**. Proficient across the full **Software Development Life Cycle (SDLC)**, utilizing technologies such as **React.js, Next.js, Swift, .NET, and Python**. Experienced in bridging intuitive **frontend development** for internal corporate tools with robust **backend data architectures**, automated validation pipelines, and **CI/CD workflows** to streamline complex testing operations. Proven ability to deliver clean, maintainable code, execute seamless **API integrations**, and ensure data integrity across both **large-scale enterprise environments and startup teams**.

Education

Istanbul Technical University

2022 – Present

Electronics and Communication Engineering

- GPA: 3.10

Relevant Course Work

- Software Development: Frontend Development, Backend Development, Data Analysis
- Algorithms & AI: Data Structures & Algorithms, Machine Learning, Artificial Neural Networks

Skills

Programming Languages & Tools

- JavaScript, Python, C#, C/C++, TypeScript, Swift, SQL, HTML, CSS, TensorFlow, PyTorch, PyMongo, MongoDB

Mobile, Web & Backend Development

- React Native, Flutter, SwiftUI, React.js, Next.js, Vue.js, .NET, Node.js, Firebase, Supabase, Redux Toolkit, MUI

Tools & DevOps

- Jenkins, Swagger, GitLab, CI/CD, Agile/Scrum

Experience

İş Bankası

Jun 2026 – Aug 2026

AI & Data Engineering Intern

full time | Istanbul, Turkey

- Engineered backend data infrastructure for the **Test Automation Team** utilizing PyMongo to control data flows and ensure raw **Software Development Life Cycle (SDLC)** data streams from internal bank applications were accurately logged into MongoDB.
- Developed **automated validation systems** to verify the consistent transfer of processed test data into **SQL tables**, establishing a protocol to automatically detect and report missing data to the team via email.
- Built monitoring logic across **multi-step data processing pipelines** to ensure data integrity, specifically tracking the ratio of missing metrics during the generation of derived performance indicators at the team, application, and package levels.
- Configured **Jenkins** to orchestrate **automated data validation tasks** for internal enterprise products, reducing manual overhead and ensuring continuous reliability of the data pipelines.

Tatilsepeti

Jul 2025 – Jun 2026

Jr. Software Developer (Promoted from Intern)

full time | Istanbul, Turkey

- Collaborated within a team of 3 frontend developers to modernize a legacy **backoffice platform** across the full Software Development Life Cycle (SDLC) using **Next.js and Material UI (MUI)**, enhancing workflow usability for ~300 employees.
- Developed dynamic dashboards for Sales, Marketing, and SEO teams to track operational metrics and efficiently manage **over millions of data records** without sacrificing performance.
- Executed seamless **API integrations utilizing Swagger** to connect **backend services**, replacing outdated manual reporting workflows with real-time, automated data visualization tools.

- Maintained strict adherence to **Agile methodologies** by actively participating in sprint planning, daily stand-ups, and **GitLab code reviews** to ensure safe, continuous feature integration.
- Transitioned to a **full-time Junior Software Developer role** after a successful one-month initial internship, subsequently authoring technical documentation to standardize the new component library.

VISIGHT Technology

Dec 2024 – Apr 2025

Mobile App Development Intern

full time | **Istanbul, Turkey**

- Led the end-to-end mobile development of a greenfield **React Native app**, taking **full ownership of architecture** and delivering the **MVP within a strict 4-month timeline**.
- Implemented Object-Oriented Programming principles and centralized state management (**Redux Toolkit**) to build modular, scalable UI components.
- Integrated asynchronous programming patterns with **Firebase** for robust authentication and real-time database interactions.

Projects

Pokerist – Texas Hold'em Analyzer iOS App

Oct 2025

- Engineered a **native iOS** hand analyzer using **SwiftUI** and **Combine** within a clean **MVVM** architecture, delivering a production-ready application in a 3-month timeline.
- Implemented an asynchronous Monte Carlo simulation processing 10,000 games per hand to calculate win probabilities without blocking the main UI thread.
- Authored detailed technical documentation for the **simulation algorithms**, facilitating future maintenance and explaining complex logic to non-technical stakeholders.
- Designed a **Liquid Glass UI** with adaptive dark/light modes, ensuring a seamless user experience across different **iOS environments**.

Sudoku Mobile App

Jun 2025

- Developed a high-performance, **cross-platform** game using **React Native**, **TypeScript**, and **Expo**, leveraging memoization and optimized state management for smooth, lag-free UI.
- Architected an **offline-first** data layer using local storage, ensuring full app functionality in low-connectivity environments.
- Refined the difficulty algorithm based on **beta testing** feedback from 20+ users, directly improving session retention metrics.
- Implemented a centralized theming system using **React Context**, allowing for scalable design updates and accessibility improvements.

Certificates

META

2025

Create the User Interface with SwiftUI

- Successfully completed the course by META about learning the SwiftUI essentials.

Stanford University with Koc University and Czech Technical University

2020

CS-Bridge, Introduction to Computer Science

- Successfully completed the summer program inspired by Stanford's CS160 - Programming Methodologies.

Leadership & Volunteering

ITU Alumni Association Club

Sep 2024 – Jun 2025

Board Member and Committee Coordinator

Istanbul, Turkey

- Organized and executed 10+ corporate visits per semester to large-scale companies like Turkish Technic and Is Bankasi, giving 250+ students access to firsthand career insights.
- Built long-term partnerships with company representatives and alumni to support recurring events and internship pipelines.
